
PARKS & RECREATION SERVICES

Since early 2018, the Township has been using CityReporter to manage inspections of our parks and facilities. Because of the software we have been able to complete and log our inspections in less time and with less effort. Knowing that our facilities and parks are inspected and that we have the backup documentation to provide compliance is something that has made it easier to provide inspection information when needed. With a small crew and growing facilities, this software has become a necessity in the industry. I am also a contract instructor for a parks training company and often refer to CityReporter as another tool that can help other municipalities large and small safely maintain their assets and prevent liability issues.

Regards, Bob Denison
Manager of Parks, Recreation & Facilities
